

Technology Committee Agenda 9-8-14

Time: 6:30PM

Location: Board Room

Questions after last meeting:

1. **Scheduling our facilities via school dude**
 - A. Use what we currently have, I have a conference call/training scheduled with School Center (our current content management system). All admins will be able to attend. During this call we can make sure we are using the calendar, both master and sub calendars, correctly
 - B. Disable all calendars on KOSD's website and implement a shared Exchange/Outlook calendar or Google calendar. Google provides you with an embed code that lets you embed the shared calendar right into your website. These are easy to setup but information will need to be communicated to admins on how to use each and also to parents about where to look

2. **Security for visitors to the district that is paperless (Raptor)**
Spoke with Vanatta

3. **What happen to student accounts in School Messenger after they graduate?**
The accounts are synced via PowerSchool once students graduate or become inactive they are disabled from School Messenger. The same holds true for new students, once active in PowerSchool they are active in School Messenger

4. **Can School Messenger be tied into PowerSchool parent portal?**

This has been completed and was activated with single sign on. A parent can now login to PowerSchool parent portal and from that portal change, delete, update SchoolMessenger information.

Agenda Items

1. Review of back-to-school
 - a. Form for teacher moves
 - b. Form for additional tech
2. Tickets
3. PowerSchool Single Sign On\School Messenger
