COVID-19 Quarantine Flowchart

Are you staff or a student?

**Staff**
Where were you exposed?
- During school, including lunch, or school-approved extra-curricular activities, including athletics?
  - Outside of school, including at home
    - Are you fully vaccinated?*
      - Yes
        - No quarantine is necessary, regardless of vaccination status.
      - No
        - Quarantine for 5 days and strictly mask around others for another 5 days.
          - A PCR or rapid antigen test administered at a medical facility is recommended on Day 5 or later after exposure. At-home COVID tests are not recommended for asymptomatic individuals.
          - If symptoms develop, you must quarantine immediately.

**Student**
Where were you exposed?
- During school, including lunch, or school-approved extra-curricular activities, including athletics?
  - Outside of school, including at home
    - Are you fully vaccinated?*
      - Yes
        - No quarantine is necessary, regardless of vaccination status.
      - No
        - Quarantine for 5 days and strictly mask around others for another 5 days.
          - A PCR or rapid antigen test administered at a medical facility is recommended on Day 5 or later after exposure. At-home COVID tests are not recommended for asymptomatic individuals.
          - If symptoms develop, you must quarantine immediately.

*Fully vaccinated are those who are:
  - Ages 18 or older and have received all recommended vaccine doses, including booster and additional primary shots for some immunocompromised people.
  - You are ages 5-17 years and completed the primary series of COVID-19 vaccines.
  - You had confirmed COVID-19 within the last 90 days (you tested positive using a viral test.)

**A person is considered a close contact if they were within 6 feet of an infectious person for 15 consecutive minutes or more in an indoor setting with or without a mask.**

Exception: In the K-12 indoor classroom setting, the close contact definition excludes students who were within 3 to 6 feet of an infected student (laboratory-confirmed or a clinically compatible illness) if both the infected student and the exposed student(s) correctly and consistently wore well-fitting masks the entire time.
